Keep your stash safe from little hands.

the dirt on weed.com
We know kids get into everything — but when that ‘everything’ includes your marijuana, such as edibles, CBD oil, and other cannabis-related products, things can take a wrong turn fast.

Weed can be downright toxic for little ones and hurts brain development.

Make sure you store your stash in a safe place — out of reach from any little hands in your house, and also locked up from any older kids looking to experiment.

If your child has ingested marijuana (or you suspect they have), contact Poison Control immediately at 800-222-1222.
